

Instructional Strategies That Engage All Learners

January 14, 2020

Maria Sells, VP of Professional Services

Knowledge is Opportunity

Cognia is a global nonprofit that has the knowledge to help schools improve outcomes for all learners.

We know schools because we are in schools

What we do for the education community

Accreditation & Certification

Assessment

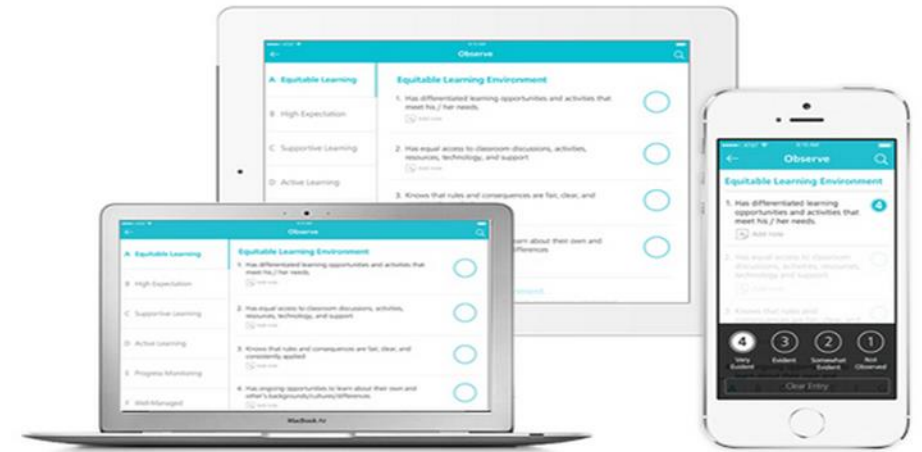

Professional Learning & Consulting

eleot Classroom Observations

- ✓ Classroom observation tool
- ✓ Focused on students, not teachers
- ✓ Identify observable and quantifiable evidence of classroom environments conducive to learning

e|ProveTM surveys: Student Engagement

- **Construction:** 20 items, 3 domains (behavior, cognitive, and emotional).
- **Purpose:** Measure engagement through student perceptions about their learning experiences.
- **Audience:** Grades 3–12

What we have learned

Engaged students usually...

- actively participate in class
- complete assignments that meet personal learning needs
- complete challenging work
- work on real-life problems
- feel safe at school

Disengaged students seldom...

- receive specific feedback
- complete assignments that meet personal learning needs
- complete challenging work
- work on real-life problems

Learning Targets

- **Reflect** on current instructional practices
- **Explore** approaches that motivate and engage students in deeper learning
- **Gain** new strategies that promote active learning

2 words

Students and teachers say...

- Active
- Listening
- Following Along
- Participating
- Paying Attention
- Complying
- Working Collaboratively
- Behaving

Student Engagement occurs when...

“... young people have **invested** themselves, their energy and their commitment ...both **within and outside the classroom**. They willingly put forward the required **effort** to find a level of **personal success** academically, socially and emotionally. They **care about others' successes** . . . they **contribute** meaningfully to the school and classroom climate.”

“They understand that their presence matters.”

Learning Target Self-Assessment

Begin with the end in mind.

Intentional Notes

What is the difference?

Tools and Strategies

- Confer, compare, and clarify strategy
- Graphic organizers / templates / formats
- Lecture T-chart
- Picture notes
- Reflection logs
- Pause, star, rank
- Sorting information
- Marzano's Summary Frames

Quick Write/Draw

Why is it important that students are not only actively participating but also cognitively engaged?

Teaching & Learning Through
Movement (Lengel & Kuczala)

Predicting

A sobering lesson.

A Sobering Lesson Learned

Predicting

A teacher spends two days as a student and is shocked at what she learns...

What do you think she learned?

Missing Title

Name that article.

What NOT to do

A How-to Plan for Widening the Gap

“Train teachers to call only on students who raise their hands and to build on correct responses to maintain a brisk classroom pace. This would enhance the self-confidence of already proficient students and minimize class participation and engagement among those who enter with lower proficiency.”

-Kim Marshall
